

EUROPEAN WASTE CATALOGUE AND HAZARDOUS WASTE LIST

VALID FROM 1 JANUARY 2002

**ENVIRONMENTAL PROTECTION AGENCY
An Ghníomhaireacht um Chaomhnú Comhshaoil**

Environmental Protection Agency

Establishment

The Environmental Protection Agency Act, 1992, was enacted on 23 April, 1992, and under this legislation the Agency was formally established on 26 July, 1993.

Responsibilities

The Agency has a wide range of statutory duties and powers under the Act. The main responsibilities of the Agency include the following:

- the licensing and regulation of large/complex industrial and other processes with significant polluting potential, on the basis of integrated pollution control (IPC) and the application of best available technologies for this purpose;
- the monitoring of environmental quality, including the establishment of databases to which the public will have access, and the publication of periodic reports on the state of the environment;
- advising public authorities in respect of environmental functions and assisting local authorities in the performance of their environmental protection functions;
- the promotion of environmentally sound practices through, for example, the encouragement of the use of environmental audits, the setting of environmental quality objectives and the issuing of codes of practice on matters affecting the environment;
- the promotion and co-ordination of environmental research;
- the licensing and regulation of all significant waste disposal and recovery activities, including landfills and the preparation and periodic updating of a national hazardous waste management plan for implementation by other bodies;
- implementing a system of permitting for the control of VOC emissions resulting from the storage of significant quantities of petrol at terminals;
- implementing and enforcing the GMO Regulations for the contained use and deliberate release of GMOs into the environment;

- preparation and implementation of a national hydrometric programme for the collection, analysis and publication of information on the levels, volumes and flows of water in rivers, lakes and groundwaters; and
- generally overseeing the performance by local authorities of their statutory environmental protection functions.

Status

The Agency is an independent public body. Its sponsor in Government is the Department of the Environment and Local Government. Independence is assured through the selection procedures for the Director General and Directors and the freedom, as provided in the legislation, to act on its own initiative. The assignment, under the legislation, of direct responsibility for a wide range of functions underpins this independence. Under the legislation, it is a specific offence to attempt to influence the Agency, or anyone acting on its behalf, in an improper manner.

Organisation

The Agency's headquarters is located in Wexford and it operates five regional inspectorates, located in Dublin, Cork, Kilkenny, Castlebar and Monaghan.

Management

The Agency is managed by a full-time Executive Board consisting of a Director General and four Directors. The Executive Board is appointed by the Government following detailed procedures laid down in the Act.

Advisory Committee

The Agency is assisted by an Advisory Committee of twelve members. The members are appointed by the Minister for the Environment and Local Government and are selected mainly from those nominated by organisations with an interest in environmental and developmental matters. The Committee has been given a wide range of advisory functions under the Act, both in relation to the Agency and to the Minister.

PREFACE

In 1994, the first European Waste Catalogue¹ and hazardous waste list² were published as two separate documents. The lists were used by the Environmental Protection Agency for the compilation of waste data from 1995 and were adopted into Irish legislation by the Waste Management Act, 1996. In 1996, the Environmental Protection Agency published a single list which incorporated both the European Waste Catalogue and the hazardous waste list³.

The European Waste Catalogue and hazardous waste list are used for the classification of all wastes and hazardous wastes and are designed to form a consistent waste classification system across the EU. They form the basis for all national and international waste reporting obligations, such as those associated with waste licences and permits, the National Waste Database and the transport of waste.

In 2000, a replacement waste list and hazardous waste list⁴ was introduced, which comes in to force on 1 January 2002. This replacement waste list has been amended three times^{5, 6, 7}. Hence, four documents are required in order to have the complete list. The documents are not always easy to obtain and following the sequence of the amendments can be difficult.

This document represents a consolidated version of all four documents. This consolidated document is designed to ease the task of classifying waste and hazardous waste and understanding the legislation associated with the classification of waste and hazardous waste. It may be used in classifying all wastes and hazardous wastes. Much of the introductory text is reproduced in full from the legislation, with the addition in places of explanatory notes. The source of reproduced text is clearly indicated in each case. Future amendments to the legislation will be incorporated into future editions of this document.

This document does not purport to be and should not be considered a legal interpretation of the EU and Irish legislation on which it is based. Any queries of this nature should in the first instance be addressed to the parent legislation.

Comments on this document are welcome. The User Comment Form provided at the end of the document may be used.

BACKGROUND INFORMATION

The European Waste Catalogue and hazardous waste list

The European Waste Catalogue and hazardous waste list presented in this document is based on the following EU legislation:

Commission Decision 2000/532/EC (*OJ L 226, 6.9.2000, p. 3*)

As amended by:

Commission Decision 2001/118/EC (*OJ L 47, 16.2.2001, p. 1*)

Commission Decision 2001/119/EC (*OJ L 47, 16.2.2001, p. 32*)

Council Decision 2001/573/EC (*OJ L 203, 28.7.2001, p. 18*)

This document will be updated as further amendments are made to the list.

Date of introduction of the new list

The European Waste Catalogue and hazardous waste list presented in this document come into force on **1 January 2002**.

All waste reporting for the year 2002 and subsequent years should use the classifications in this document.

All waste reporting for the year 2001 and earlier should use ‘*Waste Catalogue and Hazardous Waste List*’, published in 1996⁸. The 1996 document will continue to be available from EPA Publications and on the EPA website (www.epa.ie) for a limited time.

Definition of waste

Waste Management Acts 1996 and 2001

Waste is defined in Section 4(1) of the Waste Management Acts 1996 and 2001 as “any substance or object belonging to a category of waste specified in the First Schedule [of the Waste Management Act] or for the time being included in the European Waste Catalogue which the holder discards or intends or is required to discard, and anything which is discarded or otherwise dealt with as if it were waste shall be presumed to be waste until the contrary is proved.”

The full text of the definition, including the First Schedule, can be read in the Waste Management Acts 1996 and 2001 (available from Government Publications or on the website of the Attorney General at www.irlgov.ie).

Definition of hazardous waste

Waste Management Acts 1996 and 2001

Hazardous waste is defined in Section 4(2) of the Waste Management Acts 1996 and 2001. The hazardous waste list forms an integral part of the definition. Figure 1 illustrates a summary of the definition and the decision sequence to be followed. Figure 1 shows that in order to be classified as hazardous waste, a waste must:

- appear on the hazardous waste list *or* be prescribed under section 4(2)(a)(ii) of the Waste Management Act; *and* also
- display one or more of the properties indicated in the Second Schedule to the Act.

The full text of the definition of hazardous waste can be read in the Waste Management Acts 1996 and 2001. It is also reproduced in full in the National Hazardous Waste Management Plan (available from EPA Publications, Richview, Clonskeagh Road, Dublin 14, tel: 01-2680100, fax: 01-2680199).

Article 2

Wastes classified as hazardous are considered to display one or more of the properties listed in Annex III to Directive 91/689/EEC and, as regards H3 to H8, H10⁹ and H11 of the said Annex, one or more of the following characteristics:

- flash point \leq (less than or equal to) 55 °C,
- one or more substances classified¹⁰ as very toxic at a total concentration \geq 0.1%
- one or more substances classified as toxic at a total concentration \geq 3 %
- one or more substances classified as harmful at a total concentration \geq 25%
- one or more corrosive substances classified as R35 at a total concentration \geq 1%
- one or more corrosive substances classified as R34 at a total concentration \geq 5%
- one or more irritant substances classified as R41 at a total concentration \geq 10%
- one or more irritant substances classified as R36, R37, R38 at a total concentration \geq 20%
- one substance known to be carcinogenic of category 1 or 2 at a concentration \geq 0.1%
- one substance known to be carcinogenic of category 3 at a concentration \geq 1%
- one substance toxic for reproduction⁹ of category 1 or 2 classified as R60, R61 at a concentration \geq 0.5%
- one substance toxic for reproduction of category 3 classified as R62, R63 at a concentration \geq 5%
- one mutagenic substance of category 1 or 2 classified as R46 at a concentration \geq 0.1%
- one mutagenic substance of category 3 classified as R40 at a concentration \geq 1%

⁹ In Directive 92/32/EEC amending for the seventh time Directive 67/548/EEC the term 'toxic for reproduction' was introduced. The term 'teratogenic' was replaced by a corresponding term 'toxic for reproduction'. This term is considered to be in line with property H10 in Annex III to Directive 91/689/EEC.

¹⁰ The classification as well as the R numbers refer to Directive 67/548/EEC on the approximation of the laws, regulations and administrative provision relating to the classification, packaging and labelling of dangerous substances (OJ L 196, 16.8.1967, p. 1.) and its subsequent amendments. The concentration limits refer to those laid down in Directive 88/379/EEC on the approximation of the laws, regulations and administrative provisions of the Member States relating to the classification, packaging and labelling of dangerous preparation (OJ L 187, 16.7.1988, p.14.) and its subsequent amendments.

Notes

1. Attribution of the hazard properties 'toxic' (and 'very toxic'), 'harmful', 'corrosive' and 'irritant' is made on the basis of the criteria laid down by Annex VI, part I A and part II B, of Council Directive 67/548/EEC of 27 June 1967 of the approximation of laws, regulations and administrative provisions relating to the classification, packaging and labelling of dangerous substances¹¹, (or by subsequent Commission Directives adapting Directive 67/548/EEC to technical progress - See the Hazardous Waste Classification Tool for information on relevant amendments).
2. With regard to attribution of the properties 'carcinogenic', 'teratogenic' and 'mutagenic', and reflecting the most recent findings, additional criteria are contained in the Guide to the classification and labelling of dangerous substances and preparations of Annex VI (part II D) to Directive 67/548/EEC, in the version as amended by Commission Directive 83/467/EEC¹² (or by subsequent Commission Directives adapting Directive 67/548/EEC to technical progress - See the Hazardous Waste Classification Tool for information on relevant amendments).

Test methods

The test methods serve to give specific meaning to the definitions given in Annex III.

The methods to be used are those described in Annex V to Directive 67/548/EEC, in the version as amended by Commission Directive 84/449/EEC¹³, or by subsequent Commission Directives adapting Directive 67/548/EEC to technical progress (See the Hazardous Waste Classification Tool for information on relevant amendments). These methods are themselves based on the work and recommendations of the competent international bodies, in particular the OECD.

Article 3

Member States may decide, in exceptional cases, on the basis of documentary evidence provided in an appropriate way by the holder, that a specific waste indicated in the list as being hazardous does not display any of the properties listed in Annex III to Directive 91/689/EEC. Without prejudice to Article 1 (4), second indent, of Directive 91/689/EEC, Member States may decide, in exceptional cases, that a waste indicated in the list as being non-hazardous displays one or more of the properties listed in Annex III to Directive 91/689/EEC. All such decisions taken by Member States shall be communicated on a

yearly basis to the Commission. The Commission shall collate these decisions and examine whether the Community list of wastes and hazardous wastes should be amended in the light of them.

Hazardous waste classification tool

The Environmental Protection Agency funded a project under the Environmental RTDI Programme entitled *Procedure for Identification of the Hazardous Components of Waste*. The project was carried out by the Clean Technology Centre, Cork Institute of Technology, Cork. The output of the project is a detailed breakdown of the complex legislation which is used in classifying the hazardous properties of a waste. Where a holder of waste wishes to provide evidence of the presence or absence of hazardous properties of that waste, in accordance with *Article 3* above, the Hazardous Waste Classification Tool provides a mechanism to do this. The project report and the Hazardous Waste Classification Tool are available on the website of the Environmental Protection Agency at www.epa.ie/techinfo. Printed copies may be available from EPA Publications, Richview, Clonskeagh Road, Dublin 14, tel: 01-2680100, fax: 01-2680199.

INSTRUCTIONS FOR USING THE LIST

Extract from Commission Decision 2000/532/EC, as amended

List of wastes pursuant to Article 1(a) of Directive 75/442/EEC on waste and Article 1(4) of Directive 91/689/EEC on hazardous waste.

Introduction

1. The present list is a harmonised list of wastes. It will be periodically reviewed on the basis of new knowledge and, in particular, of research results, and if necessary revised in accordance with Article 18 of Directive 75/442/EEC. However, the inclusion of a material in the list does not mean that the material is a waste in all circumstances. Materials are considered to be waste only where the definition of waste in Article 1(a) of Directive 75/442/EEC is met.
2. Wastes included in the list are subject to the provisions of Directive 75/442/EEC except where Article 2 (1)(b) of this Directive applies¹⁴.
3. The different types of wastes in the list are fully defined by the six-digit code for the waste and the respective two-digit and four-digit chapter headings. This implies that the following steps should be taken to identify a waste in the list.
 - 3.1 Identify the source generating the waste in Chapters 01 to 12 or 17 to 20 and identify the appropriate six-digit code of the waste (excluding codes ending with 99 of these chapters). A specific production unit may need to classify its activities in several chapters. For instance, a car manufacturer may find its wastes listed in chapters 12 (wastes from shaping and surfacing treatment of metals) 11 (inorganic wastes containing metals from metal treatment and the coating of metals) and 08 (wastes from the use of coatings), depending on the different process steps.

Note: separately collected packaging waste (including mixtures of different packaging materials) shall be classified in 15 01, not in 20 01.
 - 3.2 If no appropriate waste code can be found in chapters 01 to 12 or 17 to 20, the chapters 13, 14 and 15 must be examined to identify the waste.
 - 3.3 If none of these waste codes apply, the waste must be identified according to Chapter 16.
 - 3.4 If the waste is not in chapter 16 either, the 99 code (wastes not otherwise specified) must be used in the section of the list corresponding to the activity identified in step one.
4. Any waste marked with an asterisk (*) is considered as a hazardous waste pursuant to Directive 91/689/EEC on hazardous waste, and subject to the provisions of that Directive unless Article 1 (5) of that Directive applies.
5. For the purpose of this Decision, 'dangerous substance' means any substance that has been or will be classified as dangerous in Directive 67/548/EEC and its subsequent amendments; 'heavy metal' means any compound of antimony, arsenic, cadmium, chromium (VI), copper, lead, mercury, nickel, selenium, tellurium, thallium and tin, as well as these materials in metallic form, as far as these are classified as dangerous substances.
6. If a waste is identified as hazardous by a specific or general reference to dangerous substances, the waste is hazardous only if the concentrations of those substances are such (i.e. percentage by weight) that the waste presents one or more of the properties listed in Annex III to Council Directive 91/689/EEC. As regards H3 to H8, H10 and H11, Article 2 of this Decision shall

¹⁴ Article 2(1)(b) lists materials that are excluded from the scope of Directive 75/442/EEC.

apply. For the characteristics H1, H2, H9 and H12 to H14, Article 2 of the present Decision does not provide specifications at present.

7. In line with Directive 1999/45/EC, which states in its preamble that the case of alloys has been considered to need further assessment because the characteristics of alloys are such that it may not be possible accurately to determine their properties using currently available conventional methods, the provisions of Article 2 would not apply to pure metal alloys (not contaminated by dangerous substances). This will be so pending further work that the Commission and Member States have taken the commitment to undertake on the specific approach of the classification of alloys. The waste materials which are specifically enumerated in this list shall remain classified as at present.
8. The following rules for numbering of the items in the list have been used: For those wastes that were not changed, the code numbers from Commission Decision 94/3/EC have been used. The codes for wastes that were changed have been deleted and remain unused in order to avoid confusion after implementation of the new list. Wastes added have been given a code that has not been used in Commission Decision 94/3/EC and Commission Decision 2000/532/EC.
